

### **high temperature corrosion of pdf**

What is high-temperature hydrogen attack? High-temperature Hydrogen Attack (HTHA) refers to the loss of strength and ductility of steel by high-temperature reaction of absorbed hydrogen with carbides in the steel, resulting in decarburization and internal fissuring.

### **Different Types of Corrosion: High-temperature Hydrogen**

Corrosion is a natural process, which converts a refined metal to a more chemically-stable form, such as its oxide, hydroxide, or sulfide. It is the gradual destruction of materials (usually metals) by chemical and/or electrochemical reaction with their environment.
