

methods in molecular biology pdf

For almost 30 years, biological scientists have come to rely on the research protocols and methodologies in the critically acclaimed Methods in Molecular Biology series. The series was the first to introduce the step-by-step protocols approach that has become the standard in all biomedical protocol

Nucleic acid sequence based amplification (NASBA) is a method in molecular biology which is used to amplify RNA sequences. History. NASBA was developed by J Compton in 1991, who defined it as "a primer-dependent technology that can be used for the continuous amplification of nucleic acids in a single mixture at one temperature". Immediately ...
