**ABSTRACT:** Five relatively recent applications of reinforcement learning methods are described. These examples were chosen to illustrate a diversity of application types, the engineering needed to build applications, and most importantly, the impressive results that these methods are able to achieve.

5.1. Introduction. Wearing clothing by human being started since the time immemorial and is a feature of all human societies now. The type of clothing in a specific society mainly depends on social, cultural, and geographic factors.

### **Artificial intelligence and its application in the apparel**

Introduction. Individual decision-making about consumption has been the subject of many theories and approaches. In this paper, we are interested to propose some steps to include consumer decision making and behaviour in formal models, trying to do this in a more realistic way than the neoclassical theory.
