

multiprocessor system on chip pdf

A system on a chip or system on chip (SoC, / ˈɛs oʊ ˈsɪk / es-oh-SEE or / s ɪ k / sock) is an integrated circuit (also known as a "chip") that integrates all components of a computer or other electronic system.

System on a chip - Wikipedia

Symmetric multiprocessing (SMP) involves a multiprocessor computer hardware and software architecture where two or more identical processors are connected to a single, shared main memory, have full access to all input and output devices, and are controlled by a single operating system instance that treats all processors equally, reserving none ...
