Hey Treethinkers! Just a quick update on some recent work by the marvelous Mike May and sensational Sebastian Häjhnä that we're very excited about in the Moore lab.

New Bayesian methods for inferring rates of lineage

Variational Bayesian methods are a family of techniques for approximating intractable integrals arising in Bayesian inference and machine learning.

Bayesian Filtering Classes Introduction. Bayesian Filtering is a probabilistic technique for data fusion. The technique combines a concise mathematical formulation of a system with observations of that system.

In estimation theory and decision theory, a Bayes estimator or a Bayes action is an estimator or decision rule that minimizes the posterior expected value of a loss function (i.e., the posterior expected loss).

The Weibull distribution is one of the most widely used lifetime distributions in reliability engineering. It is a versatile distribution that can take on the characteristics of other types of distributions, based on the value of the shape parameter, .

Standard verification methods "Eyeball" verification. One of the oldest and best verification methods is the good old fashioned visual, or "eyeball", method: look at the forecast and observations side by side and use

human judgment to discern the forecast errors.
