When running a training or mentoring session, people often ask what runtime settings they should use; as if there is a magical list of settings that will always be correct for any testing situation.

### **LoadRunner Script Runtime Settings - My Load Test**

Hi, I am using for loop to repeat first transaction & after completing for loop, second transaction should start. The script work well without parameterization on one variable, but when the parameterization is used, the for loop is using same (first value) value for the entire loop.
