Principles of Bone Biology is the essential resource for anyone involved in the study of bones. It is the most comprehensive, complete, up-to-date source of information on all aspects of bones and bone biology in one convenient source.

Principles of Bone Biology - 2nd Edition

Normal Bone Bone undergoes a continuous process of renewal with approximately 25% of trabecular bone and 3% of cortical bone being replaced annually. This remodeling process is referred to as a quantum phenomenon because it occurs in discrete units or packets. Osteoclasts resorb the old bone and osteoblasts replace it. The group of cells that work cooperatively to create one new packet of bone ...
