Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Data scientists have hundreds of probability distributions from which to choose. Where to start? Data science, whatever it may be, remains a big deal. â€œA data scientist is better at statistics than any software engineer,â€ you may overhear a pundit say, at your local tech get-togethers and hackathons. The applied mathematicians have their ...
